SubtitleEdit

BRAND IDENTITY & SYSTEM MANUAL

VERSION 1.0 • OFFICIAL

SubtitleEdit (Video Subtitle Encoder) is an ultra-fast, hardware-safe utility engineered to eliminate rendering wait times and prevent hardware stress when integrating subtitles for television USB playback. This manual governs visual design, brand consistency, and interface integrity.

Master Identity & Emblem

The visual mark integrates three essential principles: the geometric play indicator (digital media), the enclosed closed-caption badge (embedded accessibility), and directional velocity fins (direct stream speed).

Brand Strategic Pillars

1. Absolute Hardware Safety

Retains CPU/GPU load between 0%–5%. Eliminates thermal degradation and fan noise by entirely avoiding frame re-encoding.

2. 100x Real-World Velocity

Completes processing in 3 to 10 seconds through direct stream multiplexing rather than multi-hour rendering cycles.

3. Television Compatibility

Engineered specifically for local and international television media players (Abans, Singer, Damro, LG, Samsung) without font corruption.

4. Zero Operational Friction

Streamlined two-step user interface without complex encoding matrices, accessible to general consumers and professionals alike.

Core Brand Essence

“Lightning-fast, television-ready subtitle embedding without stressing your computer hardware.” SubtitleEdit delivers dependable, professional media preparation in seconds.

Visual Identity & Color Architecture

The SubtitleEdit palette balances deep obsidian surfaces with cybernetic accents, communicating computational velocity, modern precision, and technical dependability.

Obsidian Base	Electric Cyan	Neon Violet	Action Mint
#0B0C10	#00A8FF	#8A2BE2	#00B894

Typography System

Primary Interface & Marketing: Segoe UI / Montserrat Bold	Display Headers (18pt–24pt)
Action Elements & Buttons: Segoe UI Semibold	UI Actions (11pt–12pt)
Sinhala Unicode Subtitle Standard: Iskoola Pota / Noto Sans Sinhala	Subtitles (20pt Bold Outline)

Market Positioning Matrix

Evaluation Metric	Standard Transcoders	SubtitleEdit Architecture
Encoding Pipeline	Full Frame Re-encode (Slow)	**Direct Stream Copy (Instant)**
Hardware Overhead	90%–100% CPU Load (Overheating)	**0%–5% CPU (Hardware Safe)**
Processing Time (1GB)	15 to 45 Minutes	**3 to 10 Seconds**
Television Readiness	Frequent Unicode text errors	**100% Native Container Support**

Packaging & Distribution Standard

All binary distributions must be compiled as single standalone executables (`SubtitleEdit.exe`) containing bundled icon assets to ensure zero-dependency deployment across Windows 7 through Windows 11.
